## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a process for pasteurizing microbial cells for obtaining PUFA or microbial oil.

Group II, claim(s) 9 and 10, drawn to a microbial oil.

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

In group I, the special technical feature is a method for pasteurizing microbial cells by heating that comprises a range of temperature, time and rates. In group II, the special technical feature is a microbial oil that has a triglyceride content wherein the composition of PUFA is described.

A pasteurization technique of group I is not required to make the microbial oil of group II and the microbial oil of group II is not part of the claimed invention of group I therefore group I and II lack unity.
